Continuation-in-Part Application Oath or Declaration; Revised Notice of Proposed Rulemaking

37 CFR PARTS 1 AND 3

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Proposed rulemaking.

SUMMARY: Patent and Trademark Office again proposes amendment of the rules of practice and forms for patent cases to specify certain additional requirements of an oath or declaration for continuation-in-part applications. The change is being proposed in view of various court decisions which have interpreted what material is available as references in continuation-in-part applications. The proposed change will clarify what matter must be disclosed by applicants in continuation-in-part applications.

DATES: Written comments by Mar 31, 1981.

ADDRESSES: Address written comments to the Commissioner of Patents and Trademarks, Washington, D.C. 20231. No additional hearing will be held since a hearing has already been held on Feb. 7, 1979. Written comments and transcript of hearing will be available for public inspection in Room 11E10 of Building 3, Crystal Plaza, at 2021 Jefferson Davis Highway, Arlington, Va.

FOR FURTHER INFORMATION CONTACT: Mr. Louis O. Maassel by telephone at (703) 557-3070, or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

SUPPLEMENTARY INFORMATION: This notice proposes to amend § 1.65 by revising paragraph (a) and by adding a new paragraph (d) and to revise forms 3.18 and 3.18a. Notice was previously given on Nov. 28, 1978 in the Federal Register (43 FR 55417-55420) of a proposal to amend these sections of Title 37 of the Code of Federal Regulations. However, this proposal was not published in the OFFICIAL GAZETTE. As stated in the proposal, the changes are intended to more clearly specify the requirements of an oath or declaration accompanying a continuation-in-part application.

The reasons for the change are set forth in the following discussion.

Any claim in a continuation-in-part application which is directed *solely* to subject matter adequately disclosed under 35 U.S.C. 112 in the parent application is entitled to the benefit of the filing date of the parent application. However, if a claim in a continuation-in-part application recites a feature which was not disclosed or adequately supported by a proper disclosure under 35 U.S.C. 112 in the parent application, but which was first introduced or adequately supported in the continuation-in-part application such a claim is entitled only to the filing date of the continuation-in-part application. *In re von Langenhoven*, 458 F.2d 132, at 136, USPQ 426 at 429 (CCPA 1972) and *Chromalloy American Corp.* v. *Alloy Surfaces Co., Inc.*, 339 F. Supp. 859 at 874, 173 USPQ 295 at 306 (D. Del. 1972).

An illustration of the effects of these and other cases is as follows: An application is filed which discloses the combination AB. Within the priority year a foreign application to the combination AB is filed by applicant and later published. More than one year after the foreign publication, but still during the pendency of the parent United States application, a second United States application is filed by the same inventor which discloses and claims the combination AC and is therefor designated a continuation-in-part application.

Upon examination of the continuation-in-part application, the examiner concludes that C is in fact a known element in the art and that it would be obvious to substitute C for B in the combination AB.

A claim drawn to AC finds no support in the parent case and therefore carries an effective date only as early as the filing of the continuation-in-part application. Therefore, the publication of AB in the foreign application more than one year prior to the filing of the continuation-in-part application is prior art under 35 U.S.C. 103 by reason of the provisions of 35 U.S.C. 102(b) and, together with a showing that C is old, may provide basis for rejection of a claim to AC for obviousness. Similarly, public use or sale of AB in the United States more than one year prior to the filing of the continuation-in-part application would be prior art under 35 U.S.C. 103 by reason of 35 U.S.C. 102(b). And the grant of a foreign patent or inventor's certificate on AB, based on a foreign application filed more than twelve months prior to and issued before filing the continuation-in-part application would be prior art under 35 U.S.C. 103 by reason of 35 U.S.C. 102(d). It is for these reasons that applicants must supply information concerning the common subject matter relative to the continuation-in-part filing date in those instances where any of the claims recite additional subject matter and are thereby only entitled to the continuation-in-part filing date. This proposed change would not require applicant to supply any kind of information in addition to that required by the current rules. Only the date relative to which the information must be supplied is being changed.

By way of further illustration, if the claims of a continuation-in-part application which are only entitled to the continuation-in-part filing date, "read on" such published, publically used or sold, or patented subject matter (e.g., as in a genus-species relationship) a rejection under 35 U.S.C. 102 would be proper. Cases of interest in this regard are *In re Steenbock*, 83 F.2d 912, 30 USPQ 45 (CCPA 1936); *In re Ruscetta*, 255 F.2d 687, 118 USPQ 101 (CCPA 1958); *In re Hafner*, 410 F.2d 1403, 161 USPQ 783 (CCPA 1969); *In re Lukach*, 442 F.2d 967, 169 USPQ 795 (CCPA 1971); and *Ex parte Hageman*, 179 USPQ 747 (Bd. App. 1971).

In addition, knowledge, use or patenting by another before the applicant's invention of additional subject matter claimed in the continuation-in-part application would also constitute prior art although such activity may not necessarily be known to the applicant.

In view of the above, § 1.65 is proposed to be amended by the addition of a paragraph (d) which requires the applicant in a continuation-in-part application, which both discloses and claims subject matter in addition to that disclosed in the prior copending application, to make an oath or declaration as of the filing date of the continuation-in-part application. Corresponding changes are being made in the oath and declaration forms in Part 3 of 37 CFR.

It is recognized that all of the information called for in the proposed forms would not be required by § 1.65(d) in some cases, such as where there is additional disclosure in the continuation-in-part application but where all claims are directed to the common subject matter disclosed in the parent application. In such instance §1.65(d) does not require any statements in the oath or declaration as to the

common subject matter as of the continuation-in-part filing date, and the applicant may modify the forms, if desired, so that the statements referring to the common subject matter are made with reference to the filing date of the parent application. However, the use of the proposed forms in these cases would act as a safeguard for applicant, since he may later amend his claims to recite some of the additional disclosure. Similarly, the examiner might disagree with applicant's conclusion that additional subject matter is not being claimed in the continuation-in-part application. For this reason and the possibility that confusion might be generated by multiple forms, no specific forms are proposed for use in the case where all of the claims in the continuation-in-part application may be entitled to the filing date of the parent application.

Where activity has occurred in connection with an invention, but is not believed to constitute prior art within the meaning of Section 102 of Title 35, United States Code (such as a prior public use or sale of an experimental nature more than one year before the date of the application), such activity may be referred to in the continuation-in-part oath or declaration with any qualifications about its prior art status deemed warranted, or it need not be mentioned in the oath or declaration at all. If such activity is not mentioned in the continuation-in-part oath or declaration but is material to the examination under 37 CFR 1.56 it, of course, must be called to the Office's attention in a separate paper.

RESPONSE TO SUBSTANTIVE PUBLIC COMMENTS RECEIVED

Written comments have already been received from seven individuals and organizations. Two individuals presented oral comments at the hearing.

The many comments objecting to the best mode requirement acknowledgment are not mentioned here since this acknowledgment requirement has been deleted in this proposal. For the time being, no further action is being taken on this item.

Proposed paragraph (a) of 37 CFR 1.65 is being revised to provide for both masculine and feminine gender.

A number of comments were directed to the argument that the examiners would misapply the provided information. The response to this line of argument is that the proper application of references is something that must be decided currently by patent examiners in the normal course of patent examination. It is not seen that the adoption of this rule change would result in any new problems.

The proposed forms are examples of forms which would meet the requirements of proposed § 1.65(d). The forms could be modified by applicant to handle specific situations such as where no additional subject matter is being claimed.

This proposal is being republished to clarify the intent and scope of the proposed changes and to provide additional opportunity for comments to be received from the public.

DIFFERENCES BETWEEN THE EARLIER PROPOSAL AND THIS PROPOSAL

Proposed paragraph (a) of § 1.65 differs from the earlier proposal in that the sentence acknowledging the requirement to disclose the best mode of the invention is not included. The best mode provision has also been deleted from the proposed forms of §§ 3.18 and 3.18a. *Classification.* Under the regulations of the Department of Commerce, this rulemaking proposal is deemed to be significant. *Regulatory Analysis.* The Patent and Trademark Office has determined that the proposed amendment of 37 CFR Parts 1 and 3 would not have major economic impact and therefor does not require a regulatory analysis.

For the foregoing reasons, and under the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, §§ 1.65, 3.18, and 3.18(a) of Title 37 CFR are proposed to be amended as follows:

In the texts of the following proposed amendments to § 1.65, additions are indicated by arrows and deletions are indicated by brackets. The changes to §3.18 and § 3.18(a) are not noted in this manner because of numerous changes in wording.

PART 1—RULES OF PRACTICE IN PATENT CASES

1. Section 1.65 is proposed to be amended by revising paragraph (a) and by adding a new paragraph (d) to read as follows:

§ 1.65 *Oath or Declaration*

In every original application the applicant must distinctly state that to the best of ►the applicant's◄ [his] knowledge and belief the invention has not been in public use or on sale in the United States more than one year prior to ►the◄ [his] application or patented or described in any printed publication in any country before ►the applicant's◄ [his] invention or more than one year prior to ►the◄ [his] application, or patented or made the subject of an inventor's certificate in any foreign country prior to the date of ►the◄ [his] application on an application filed by ►the applicant◄ [himself] or ►the applicant's◄ [his] legal representatives or assigns more than twelve months prior to ►the◄ [his] application in this country. ►The applicant◄ [he] must acknowledge ►the◄ [a] duty to disclose information ►the applicant◄ [he] is aware of which is material to the examination of the application. ►The applicant◄ [He] shall state whether or not any application for patent or inventor's certificate on the same invention has been filed in any foreign country, either by ►the applicant◄ [himself] or ►the applicant's◄ [his] legal representatives or assigns. If any such application has been filed, the applicant shall name the country in which the earliest such application was filed, and shall give the day, month, and year of its filing; ►the applicant◄ [he] shall also identify by country and by day, month, and year of filing, every such foreign application filed more than twelve months before the filing of the application in this country.

(2) This statement (i) must be subscribed to by the applicant, and (ii) must either (a) be sworn to (or affirmed) as provided in § 1.66 or (b) include the personal declaration of the applicant as prescribed in § 1.68. See § 1.153 for design cases and § 1.162 for plant cases.

* * * * *

►(d) An applicant in a continuation-in-part application filed under the conditions specified in 35 U.S.C. 120 which discloses and claims subject matter in addition to that disclosed in the prior copending application, must identify the prior copending application and make an oath or declaration which includes the statements required by paragraph (a) of this section, or a list of the exceptions to the statements, (1) as to the common subject matter and (2) as to the noncommon subject matter. The statements must be made in reference to the filing date of the continuation-in-part application in both cases (1) and (2).◄

OFFICIAL GAZETTE NOTICE

Extension of Time for Filing Notices of Opposition

By means of an Official Gazette Notice dated January 22, 1981, the Patent and Trademark Office announced that (1) the automatic 14-day extension of filing Notices of Opposition to registration of marks published in the Official Gazettes dated May 20, 1980 thru December 30, 1980 would not be continued into calendar year 1981 and (2) extensions would be granted, as necessary, only on an issue-by-issue basis.

Continued difficulties with printing and mailing of the Official Gazette have made advisable a modification of the policy announced in the Notice dated January 22, 1981 and the reinstatement of the automatic 14-day extension. Therefore, beginning with the Official Gazette issue dated January 13, 1981, a Notice of Opposition to registration of any mark appearing in the Official Gazette will be considered timely if filed within 44 days after the date on the cover of the Official Gazette in which the mark appears.

This Notice will be printed in each succeeding issue of the Official Gazette, and the announced 14-day extension will continue to apply unless specifically terminated or modified by subsequent Notice.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.
